Adrián Ferré

Full Stack Developer & Squad Lead & Chapter Lead

Extracto

I love to create software solutions, learning as much as I can,
and improving my skills in the process. I embrace innovation and
challenges as a way to go always one step forward. I like to share
my knowledge with my colleagues and also my students, learning
from them too.

I'm actually working with React, Redux, Node, MongoDB Stack, and
defining the Front End architecture.
